Subject: Fish Tracking field work - 0730 Thursday start time

Sean and Davis,

We are not able to staff oversight on this fourth boat that will be doing the troubleshooting/repair of the fish tracking receiver. We have all 3 of our available staff in Portland on the 2 baseline surface sediment sampling boats and the 1 sediment sampling boat at Gasco, which are going to be in areas of potential NAPL/sheens. I checked with Madi Novak but DEQ is not available to provide oversight for this. The radio receiver repair was an unplanned activity without much notice and we were not aware that they would have the additional boat involved until this morning.

Thank you,

Howard S. Young, LG | CDM Smith

Subject: Fish Tracking field work - 0730 Thursday start time

Hi Davis,

I am writing to confirm that we will have a field team working on the Portland Harbor Fish Tracking study on this Thursday 5/31. They will be meeting at the Swan Island boat ramp at 0730. We anticipate less than a full day of work. The objective is to pull up the receiver giving an error code, connect to it, and repair or replace it.

Mark Tauscher is the AECOM point of contact. His phone number is (b) (6). If an EPA observer needs to make any additional arrangements or has logistical questions, they may contact him directly.

If an EPA observer is unavailable, we will provide a written summary of the day's activity within a day or two. Please let me know if you have any questions.

Thanks,
Jenny
